CRM Behavior options

✓ Save

4. Click the toggle to turn the service **ON**.
(*The button will switch between “On” and “Off.”*)

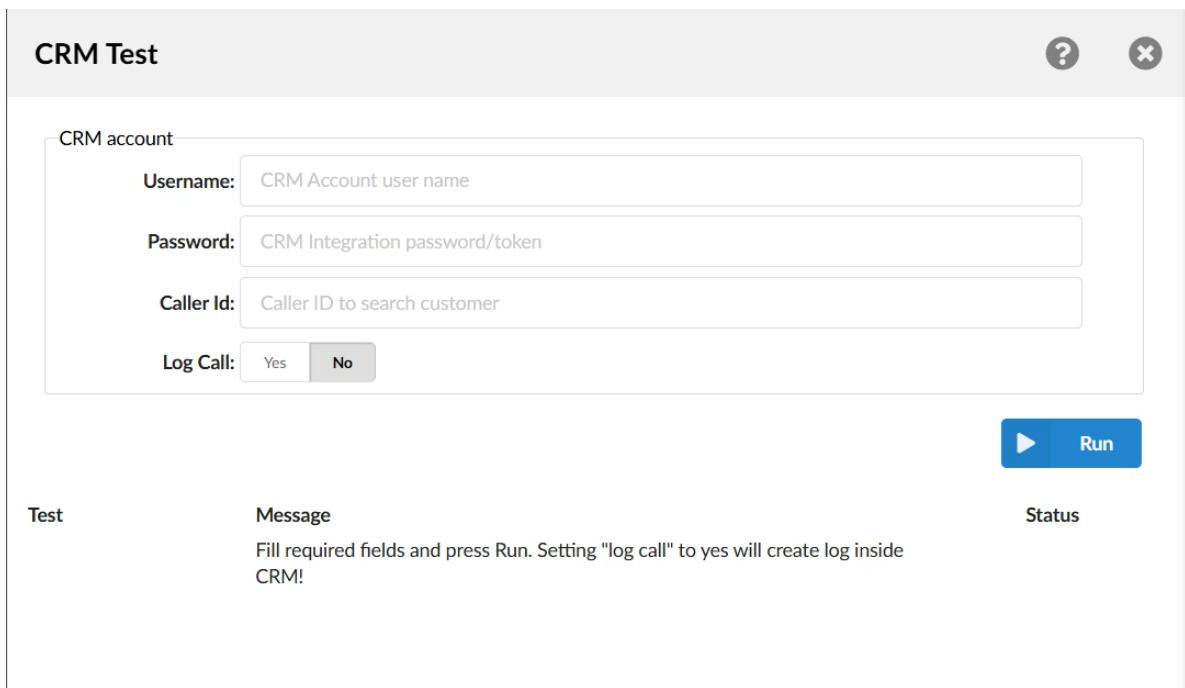

Step 2: Select the CRM Type

1. In the **CRM Type** dropdown menu, select **ProprietaryCRM**.
(*This option is used when customers want to connect*

their own CRM system.)

Step 3: Enter Your API Information

1. In the **Rest API URL** field, type your CRM's API URL.
 1. Example: `https://exampleurl.com`
 2. Once all required fields are filled in, a "**Save to enable**" button will appear.
2. Click **Save** to apply your settings.

The screenshot shows a configuration window titled "CRM Test". At the top, there are three buttons: a question mark icon, a close (X) icon, and a "Run" button with a play icon. The main area is titled "CRM account" and contains four input fields: "Username" (CRM Account user name), "Password" (CRM Integration password/token), "Caller Id" (Caller ID to search customer), and a "Log Call" switch (set to "No"). Below this is a "Test" section with a "Message" field containing the instruction: "Fill required fields and press Run. Setting "log call" to yes will create log inside CRM!". The "Status" column is currently empty.

3. A New window will appear to the left. In the window, enter the following:
 1. **Username:** Your CRM account username
 2. **Password:** Your CRM account password
 3. **Caller ID (optional):** Use this to test customer lookups by phone number

4. **Log Call:** Choose **Yes** to log the test call inside your CRM
4. When finished, click **Run** to start the test
 1. If everything is set up correctly, you'll see confirmation that the connection works.

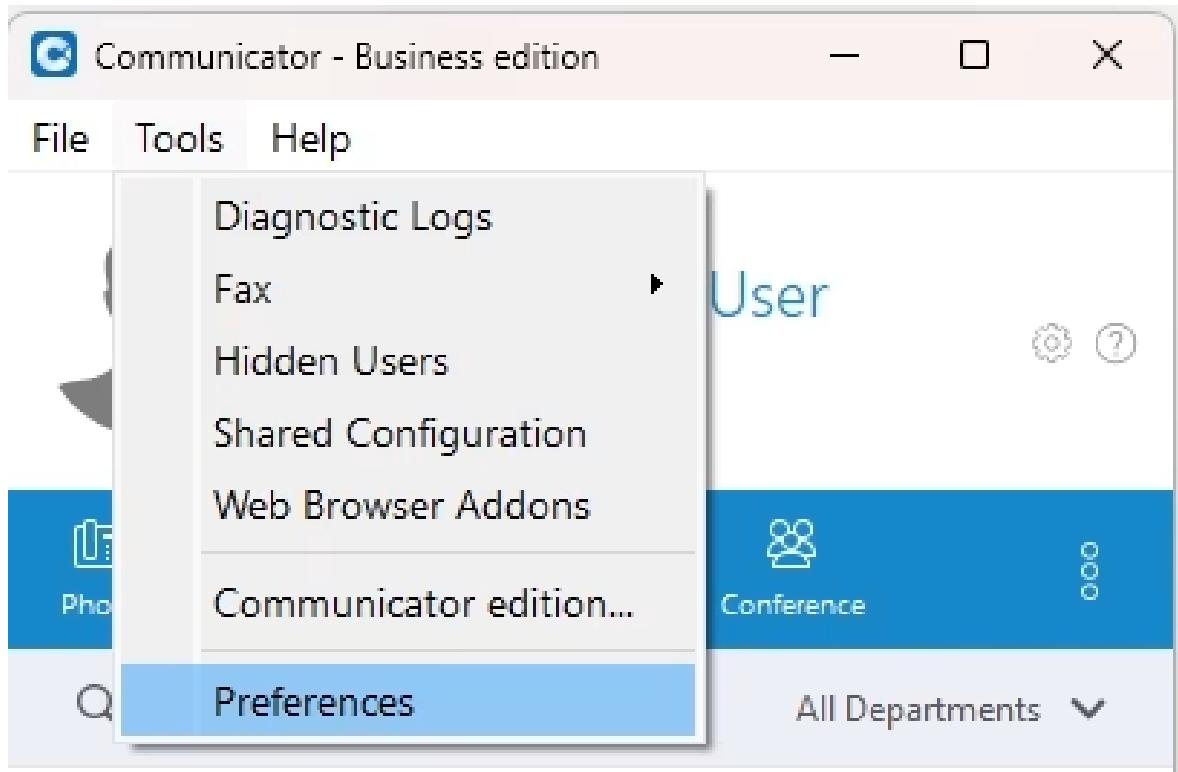

Step 5: Configure Log Options (Optional)

You can choose what types of calls are automatically logged to your CRM.

1. Go to **Log Options** under CRM settings.
2. Choose **Yes**, **No**, or **Not Set** for each of the following:
 - **Log inbound calls**
 - **Log outbound calls**
 - **Log answered calls**
 - **Log unanswered calls**
 - **Upload recordings**

Communicator Configuration

Step 1: Log into Communicator CRM Settings

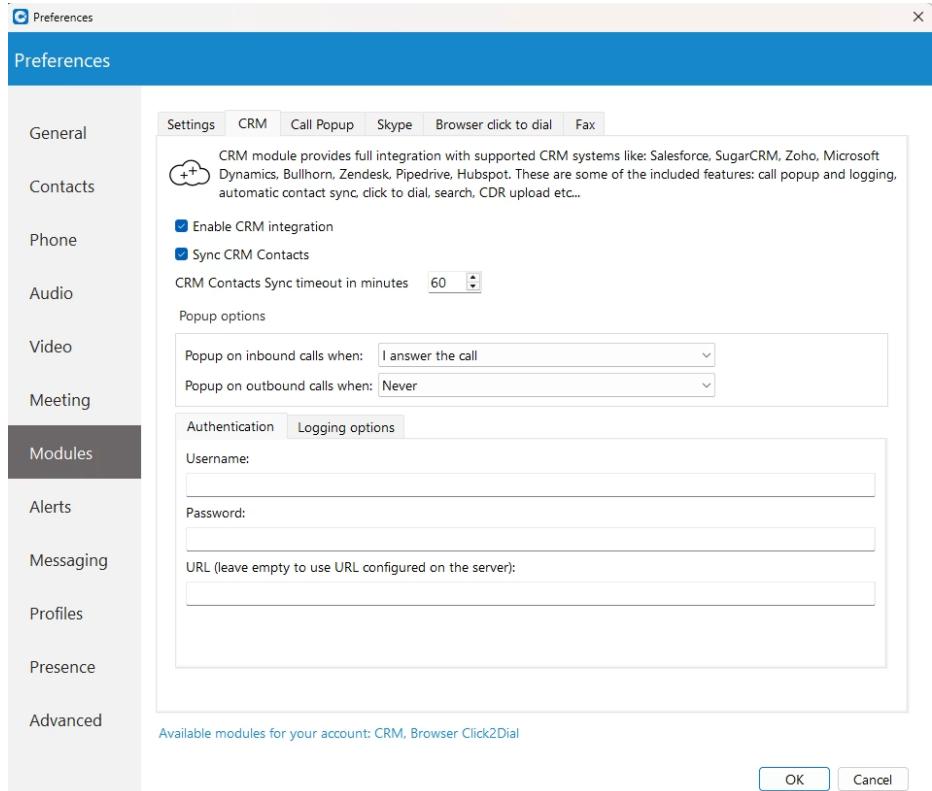

1. Select Tools
2. Select Preferences
