Log file collection

Upload log file

2. Then, make an audio call, and go to the path: Device support Log file collection, select Audio collection and Collect the operating system logs, then click **Start**.

Export log file

☒ Collect the operating system logs ?

☒ Audio collection ?

▶ Start

Collected Duration 00:00/60:00

Save the file to the following path by default

D:/Users/yl4142/Desktop

Change dire...

Trouble descriptions (optional)

0/300

Please tell us the time of the problem and detail description.

Export

3. Now reproduce the audio issue again. After the audio issue is reproduced, please click Stop to export the diagnostic files (audio and log files).

Note: The exported file is in a .zip file format.

4. Once you have the ZIP file please Email it to support@firelinecommunications.com including a description of what occurred and the time it occurred.
